The 5th Movement Disorders Conference.2023.

Dear colleagues and friends,

It is a great pleasure to welcome you to

The 5th Saudi Movement Disorders Conference

This meeting provides a wonderful opportunity to meet and share your experience, and it will be held in Double Tree by Hilton The Financial District, Riyadh, Saudi Arabia on 19th & 20th of May 2023. No other place would be better than Riyadh to be the best place for this year's event.

The scientific programme is designed to facilitate and stimulate the integration between doctors of different disciplines in Movements Disorder (MD)-Neurology. The meeting will accommodate local as well as international speakers over all the two days, arranged in such a way that most participants will find sessions of their interest in how MD in Neurology is reaching new highs. This approach creates an ideal atmosphere to advance and promote the knowledge of MD diseases thereby fulfilling an important aim of the meeting.

I personally welcome and encourage all to attend and share in the exchange of knowledge, practice, and academic information that will be discussed to enable an even brighter future for MD.

I would like to thank the Saudi Neurology Society (SNS) & the sponsoring companies for participating in making this conference achievable.

*I hope that the experiences in this event will be engraved in your memory.
Have a great conference time...*

Dr. Heba Shinawi
Head of Movement Disorder Conference

Target
Audience:

Neurologists . Neurosurgeons . Psychiatrists . Residents . Medical students . Nurses
